

MEC POWDER BUSHINGS - MEC RELOADING #45 POWDER BUSHING

[Reloading](#) > [Reloading Presses](#) > [Reloading Press Accessories](#)

We stock a variety of the MEC powder bushings. Each bushing holds a unique volume enabling you to adjust the powder load for your rounds. It is always recommended to use a scale to check powder weights for accuracy. We offer individual bushings in #7 thru #13 and #16 thru #38. Please refer to the MEC website for powder charts that will give you a recommended bushing and start point for your specific powder at www.mecreloaders.com

MEC Powder Bushings Safety Instruction Guide

Introduction

Thank you for choosing MEC Powder Bushings. This guide provides essential safety instructions to ensure the safe and effective use of our products. Please read this document carefully before using the bushings to ensure your safety and the best performance from your reloading equipment.

General Safety Guidelines

- Always ensure that you are using the correct powder bushing for your specific powder type and loading requirements.
- Do not exceed the recommended powder load for your rounds as specified in the powder charts.
- Use a reliable scale to check powder weights for accuracy before loading.
- Store powder bushings in a cool, dry place away from direct sunlight and moisture.
- Keep powder bushings out of reach of children and vulnerable individuals.
- Regularly inspect your powder bushings for signs of wear or damage before use.

Specific Safety Precautions for Use

- **Hazard Awareness:** Be aware of potential hazards such as static electricity, which can ignite powders. Ground yourself before handling powders.
- **Personal Protective Equipment (PPE):** Wear safety glasses and gloves when handling powders to prevent irritation or injury.
- **Ventilation:** Ensure that your reloading area is wellventilated to avoid inhaling any dust or fumes.
- **Emergency Procedures:** In case of accidental spillage, clean up immediately using appropriate methods to prevent accidents or fires.

Instructions for Installation and Usage

1. Selecting the Correct Bushing:

- Refer to the MEC website for powder charts that recommend the appropriate bushing for your specific powder.
- Choose from the available bushings, which range from #7 to #13 and #16 to #38.

2. Installation:

- Ensure your reloading press is turned off and unplugged before installation.
- Remove any existing bushing from the press.
- Insert the selected MEC powder bushing securely into the press.
- Doublecheck that the bushing is seated correctly to avoid any leaks during operation.

3. Usage:

- Measure your powder using the scale before loading.
- Pour the measured powder into the bushing and ensure that it is not overfilled.
- Follow the reloading procedure as per your reloading press instructions.
- After use, clean the bushing to prevent powder residue buildup.

Disposal Instructions

- Dispose of any damaged or worn powder bushings in accordance with local regulations.
- Do not throw powder bushings in regular waste. Check with local authorities for proper disposal methods.

- Ensure that any leftover powders are disposed of safely and in compliance with local hazardous waste regulations.

Contact Information for Further Support

For any safety inquiries or additional support, please refer to our official website or contact your local MEC representative. Always ensure that you have the latest safety information and product updates.

Thank you for your attention to these safety instructions. Your safety is our priority, and we hope you have a successful reloading experience with MEC Powder Bushings.
