

E-Max Low Profile, Behind the Neck Electronic Hearing Protection

[Shooting Accessories](#) > [Ear & Eye Protection](#) > [Ear Muffs](#)

The E-Max® Behind-the-Head hearing protection combines great circuitry with a low profile ear cup that's ideal for shotgun shooters and action shooters. The E-Max® amplify sounds up to 20dB, controlled by the volume dial on the right ear cup. This is beneficial for normal communication, range commands, and environmental sounds. With sounds above 85 decibels, the speakers shut off for a split second to protect the shooters hearing. Two microphones, one in each cup, give the user true stereo function and help the user to localize sound.

Safety Instruction Guide for Caldwell EMax Low Profile, Behind the Neck Electronic Hearing Protection

Introduction

Thank you for choosing the Caldwell EMax Low Profile, Behind the Neck Electronic Hearing Protection. This product is designed to provide effective hearing protection while allowing you to communicate and be aware of your surroundings. Please read this safety instruction guide carefully to ensure safe and effective use of the product, in compliance with the EU General Product Safety Regulation (GPSR).

General Safety Guidelines

- Ensure that the product is used only for its intended purpose, which is to protect your hearing while shooting or in loud environments.
- Regularly inspect the hearing protection for any signs of damage or wear. If any parts are damaged, discontinue use and replace the product.
- Keep the hearing protection away from children and vulnerable individuals who may not understand how to use it safely.
- Follow all manufacturer instructions for use, maintenance, and storage of the product.

Specific Safety Precautions for Use

- **Hearing Protection:** The EMax amplifies sounds up to 20dB. Be aware that sounds above 85 decibels will cause the speakers to shut off momentarily to protect your hearing.
- **Communication:** Use the volume dial on the right ear cup to adjust sound levels for normal communication and environmental sounds.
- **Stereo Functionality:** The two microphones provide true stereo sound, helping you to localize sounds effectively.
- **Fit and Comfort:** Ensure that the ear cups fit securely against your ears to provide optimal protection. Adjust the headband for a comfortable fit.
- **Environmental Awareness:** Always remain aware of your surroundings, especially in shooting ranges or outdoor environments.

Instructions for Installation and Usage

1. **Unboxing:** Carefully remove the EMax hearing protection from the packaging. Check for any visible damage.
2. **Battery Installation:**
 - Open the battery compartment located on the ear cup.
 - Insert the battery as indicated by the polarity markings inside the compartment.
 - Close the battery compartment securely.
3. **Wearing the Headset:**
 - Place the headband behind your neck.
 - Adjust the ear cups to ensure they cover your ears completely and fit snugly.
4. **Adjusting Volume:**
 - Turn the volume dial on the right ear cup to adjust the amplification level to your preference.
5. **Testing:** Before use, test the hearing protection in a safe environment to ensure it is functioning correctly.
6. **Usage:** Use the hearing protection during shooting or in loud environments, ensuring that it is worn correctly at all times.

Disposal Instructions

- Dispose of the hearing protection in accordance with local regulations regarding electronic waste.
- Remove batteries and recycle them according to local guidelines.
- Do not dispose of the product in regular household waste.

Contact Information for Further Support

For any inquiries regarding safety or product issues, please refer to the contact information provided in the product packaging or visit the manufacturer's website for assistance.

Conclusion

By following these safety instructions, you can ensure the safe and effective use of your Caldwell EMax Low Profile, Behind the Neck Electronic Hearing Protection. Stay safe and enjoy your shooting experience!
