

Full Length Die 7/8 - Full Length Die 260 Rem

[Reloading](#) > [Reloading Dies](#) > [Rifle Dies](#)

The FL dies is used to size the cartridge case on full length. In addition to a removable expander our FL dies have an integrated primer ejector pin. All used spindles, the expander and ejector pin can be replaced easily if necessary, with just little effort.

Calibration takes place when the cartridge case is pushed into the die. The neck of the case is calibrated from the inside when it is moved out of the die. This will form the cartridge case and achieves a correct neck tension.

The correct position of the die in the press is set with the lock nut. All relevant components have an article number for easy reordering if necessary. You will find further instructions and assistance in selecting accessories and spare parts in the manual.

Full Length Die 7/8 Safety Instruction Guide

Introduction

Thank you for choosing the Full Length Die 7/8 for your reloading needs. This guide provides essential safety instructions and usage information to ensure that you can use the product safely and effectively, in compliance with the European General Product Safety Regulation (GPSR).

General Safety Guidelines

- Always read and understand the instructions before using the Full Length Die.
- Ensure that the die is used only for its intended purpose of resizing cartridge cases.
- Keep the die and all related tools out of reach of children and vulnerable individuals.
- Regularly inspect the die for any signs of wear or damage before each use.
- Use personal protective equipment (PPE) such as safety glasses and gloves when operating the die.
- Report any unsafe conditions or accidents to the appropriate authorities.
- Stay informed about product recalls and safety updates via the EU Safety Gate platform.

Specific Safety Precautions for Use

- Ensure that the die is securely mounted in the press before use to prevent accidents.
- Do not exceed the recommended pressure limits when resizing cartridge cases.
- Avoid using the die with damaged or improperly sized cartridge cases to prevent malfunction.
- Always follow the manufacturer's guidelines for maintenance and replacement of components.
- Handle all reloading components, including primers and powder, with care to avoid accidental ignition.
- Never leave the die unattended while in use.

Instructions for Installation and Usage

1. Installation

- Securely attach the Full Length Die to your reloading press using the lock nut to ensure a stable setup.
- Check that the die is aligned properly with the press to avoid misalignment during operation.

2. Usage

- Insert the cartridge case into the die, ensuring that it is positioned correctly.
- Gradually push the cartridge case into the die to resize it. The neck of the case will be calibrated from the inside.
- After resizing, remove the cartridge case from the die carefully to avoid injury.
- If necessary, replace any worn spindles, expanders, or ejector pins with minimal effort, following the manufacturer's instructions.

3. Calibration

- Calibration occurs when the cartridge case is pushed into the die. Ensure that the die is properly set up for accurate calibration.

Disposal Instructions

- Dispose of any worn or damaged components of the Full Length Die in accordance with local regulations.
- Do not dispose of reloading materials or components in regular household waste. Follow your local guidelines for hazardous waste disposal.

Contact Information for Further Support

For further support or inquiries regarding safety and usage of the Full Length Die, please refer to the contact information provided in the product manual or on the manufacturer's website.

By following these safety instructions, you can ensure a safe and effective reloading experience with the Full Length Die 7/8. Thank you for your attention to safety and compliance.
