Bullet Seater with crimp (Seat)

Our standard bullet seater guides the bullet in an exact guide bushing. This ensures good accuracy.

The Bullet Seater is the solid choice for quickly seating the bullet.

As standard, the Bullet Seater offers the option to crimp the mouth of the cartridge case. This means that you can work with or without a crimp.

The seater-head can be easily replaced to another type. We offer various types of seater-heads.

Choosing the correct seater head for the bullet used often improves concentricity significantly.

You will find further instructions and assistance in selecting accessories and spare parts in the manual.

Seater with Crimp 7/8 Safety Instructions

Introduction

Thank you for choosing the Seater with Crimp 7/8. This product is designed for precision bullet seating and crimping in reloading applications. To ensure safe and effective use of this product, please read and follow these safety instructions carefully.

General Safety Guidelines

- Always handle reloading equipment with care and respect.
- Ensure you are familiar with the operation and use of your reloading equipment.
- Keep the product out of reach of children and unauthorized users.
- Use the product only for its intended purpose as specified in the manual.
- Regularly inspect the product for any signs of wear or damage before use.
- Store the product in a dry, safe place when not in use.

Specific Safety Precautions for Use

- Wear appropriate safety gear, including safety glasses and gloves, when using the Seater with Crimp.
- Ensure the workspace is clean and free from distractions while reloading.
- Avoid using the product if you are under the influence of drugs or alcohol.
- Do not exceed the recommended pressure limits for the cartridges you are working with.
- Always follow the specific instructions for the type of bullet and cartridge being used.
- If you notice any unusual behavior or performance from the product, stop using it immediately and consult the manual.

Instructions for Installation and Usage

Installation

1. **Prepare Your Workspace:** Ensure your reloading area is clean, organized, and welllit.
2. **Select the Appropriate Seater Head:** Choose the correct seater head compatible with the bullet you are using to improve concentricity.
3. **Attach the Seater:**
 - Securely attach the Seater with Crimp to your reloading press using the 7/8 thread.
 - Ensure it is tightly fastened to prevent any movement during operation.

Usage

1. **Adjust the Seater Head:**
 - If necessary, replace the seater head for different bullet types as per the manual instructions.
 - Ensure the head is securely attached before proceeding.
2. **Prepare Cartridges:**
 - Inspect your cartridge cases for cleanliness and integrity.
 - Ensure you have the correct bullets ready for seating.
3. **Seating the Bullet:**
 - Place a cartridge case into the press.
 - Position the bullet on top of the case and activate the press to seat the bullet.
 - Check the depth of the seated bullet to ensure it meets specifications.
4. **Crimping:**
 - If crimping is desired, adjust the crimping mechanism as specified in the manual.
 - Activate the press to crimp the cartridge case mouth securely.
5. **Final Inspection:**
 - After seating and crimping, inspect the finished cartridge for proper seating and crimping.

Disposal Instructions

- Dispose of any defective or wornout components in accordance with local regulations.
- Ensure that all reloading materials, including spent cartridges and unused components, are disposed of safely.
- Do not dispose of materials in a manner that could pose a risk to the environment or public safety.

Contact Information for Further Support

For any inquiries or support regarding the Seater with Crimp 7/8, please refer to the manufacturer's website or contact your local distributor for assistance. Always ensure that you have the product details and any relevant information ready for a more efficient response.

Thank you for prioritizing safety while using the Seater with Crimp 7/8. Your adherence to these guidelines contributes to a safer reloading experience.
