

Smith & Wesson 44 Mag Comet Brake Reduces Recoil - Smith and Wesson Stealth Hunter 1854 .357 Mag Comet Muzzle Brake

[Rifle Parts](#) > [Muzzle Devices](#) > [Compensators & Muzzle Brakes](#)

The "Comet Brake" is designed to be a slim, flush fit and aggressive rifle muzzle brake that works especially well to reduce felt recoil.

Each brake is made to match the exact OD (outer diameter) and the thread pitch (tpi) of the rifle make/model that's listed.

Your rifle MUST be threaded to use this brake.

If you plan to get your rifle threaded by a gunsmith, provide them with the exact specs listed.

NO IMAGE
AVAILABLE

- Tough, stress proof steel construction (salt bath black nitride 4140 steel)
- Reduces recoil and muzzle flash by approximately 25%
- Not a one-size-fits-all (1.73" total length, 1" hangs past barrel when installed)
- Designed for optimal performance and accuracy with individual calibers
- To install, hand tighten and use blue Loctite, no indexing or torque specs

Safety Instruction Guide for Smith & Wesson 44 Mag Comet Brake

Introduction

Thank you for choosing the Smith & Wesson 44 Mag Comet Brake. This guide provides essential safety information and instructions for the proper use and installation of the Comet Brake. Please read this guide thoroughly to ensure safe and effective operation.

General Safety Guidelines

- Ensure that your rifle is threaded before attempting to install the Comet Brake. Failure to do so may result in improper installation and could cause injury.
- Always wear appropriate safety gear, including eye protection and hearing protection, when using firearms equipped with a muzzle brake.
- Be aware of your surroundings and ensure a safe shooting environment.
- Keep the Comet Brake and all firearms out of reach of children and unauthorized users.
- Regularly inspect your Comet Brake for any signs of wear or damage before each use.
- If you notice any abnormalities or malfunctions, cease use immediately and consult a qualified gunsmith.

Specific Safety Precautions for Use

- The Comet Brake is designed to reduce recoil and muzzle flash by approximately 25%. However, it is important to understand that it does not eliminate recoil entirely.
- Do not modify the Comet Brake in any way. Alterations may compromise safety and performance.
- Ensure that the Comet Brake is properly installed and securely tightened before firing your rifle.
- Use only the specified caliber for which the Comet Brake is designed to ensure optimal performance and safety.
- Avoid using the Comet Brake with ammunition that exceeds the manufacturer's specifications.

Instructions for Installation and Usage

1. Installation:

- Confirm that your rifle is unloaded and pointed in a safe direction.
- Clean the threaded area of the rifle barrel to ensure a proper fit.
- Align the Comet Brake with the threads on the barrel.
- Hand tighten the Comet Brake onto the barrel. Do not overtighten.
- Apply blue Loctite to the threads for added security.
- Allow the Loctite to cure as per the manufacturer's instructions before using the rifle.

2. Usage:

- After installation, conduct a function check to ensure that the Comet Brake is securely attached.
- When firing, maintain a firm grip on the rifle and be prepared for reduced recoil.
- Always follow safe handling practices as outlined in your rifle's user manual.

Disposal Instructions

- Dispose of the Comet Brake in accordance with local regulations.
- Do not dispose of the Comet Brake in regular household waste. Contact local waste management authorities for proper disposal methods.

Contact Information for Further Support

For any safety inquiries or support regarding the Smith & Wesson 44 Mag Comet Brake, please refer to the appropriate contact points provided by the manufacturer or your local dealer. Ensure you have the product information on hand for efficient assistance.

By adhering to these guidelines, you can ensure a safe and enjoyable experience with your Smith & Wesson 44 Mag Comet Brake. Thank you for your attention to safety.
