The MDT ACC Elite Forend is purpose-built for serious precision shooters who demand ultimate stability and customization. Measuring 19 inches and featuring full-length integrated ARCA with M-LOK compatibility, it supports both internal and external weights, Baker Wings, and any M-LOK accessory you need to dominate your setup.

Wider, thicker, and longer than before, the forend eliminates measurable flex to create a rock-solid shooting platform. It's drilled and tapped to accept MDT's modular co-indexing Night Vision Hood or Control Bridge, offering complete system integration. Custom-cut grip tape is included for the underside—ideal for barricade contact and bag stability.

Fine-tune your rifle's balance with adjustable weight placement and achieve instinctive point-and-shoot control. The adjustable M-LOK thumb rest ensures comfort tailored to your grip, while the updated magwell and latch eliminate slop for flawless function with top-tier actions.
