By installing a Timney trigger, you upgrade to a precision-engineered system designed to improve accuracy and control. Timney triggers offer adjustable pull weights, virtually zero creep, and a clean, crisp break often described as “breaking a glass rod.” When you squeeze a Timney trigger, the only sensation you feel is the pressure required to fire — nothing else. The rifle stays on target, and shot placement improves.

As one of the oldest and largest trigger manufacturers in the world, and a family-owned company spanning two generations, Timney is dedicated to delivering a lifetime of accurate shooting. Their mission is simple: manufacture the highest-quality precision triggers possible. This commitment is achieved by combining skilled craftsmanship, deep technical knowledge, and the latest machining technology.

Timney’s confidence in their products is reflected in their lifetime warranty on all triggers. Trigger housings are CNC-machined from aircraft-grade 6061-T6 aluminum alloy, selected after decades of material testing for its exceptional stability and ability to maintain precise geometric tolerances better than steel. Critical wear components such as the trigger and sear are machined from solid steel using advanced EDM and CNC processes, then hardened, ground, and polished to meet Timney’s exacting standards.
