Timney was asked to develop a more affordable trigger for budget-build, AR-style, semi-automatic, magazine-fed shotguns—without sacrificing quality. You asked, Timney delivered. Introducing the Impact SG, the latest addition to the IMPACT series, engineered specifically for AR-style shotguns. 

Timney's engineers carefully designed every component to be precision-machined, avoiding shortcuts such as metal injection molding or stamped legacy parts. Each trigger is still hand-assembled and thoroughly tested by Timney's technicians, ensuring the quality and reliability shooters expect—at a price point built for value-focused builds.

All trigger components are machined from premium materials to ensure a lifetime of dependable performance. The trigger housing is constructed from an aluminum alloy and finished with a blue anodizing for enhanced resistance to weather and corrosion. The hammer is made from heat-treated tool steel with a distinctive nickel-plated finish to maximize lubricity and trigger performance. Both the trigger shoe and disconnector are also machined from tool steel, heat-treated for durability, and finished in solid black for a smooth, consistent feel.

The Impact SG features a factory-set pull weight of 3 to 4 pounds, delivering a crisp, clean break that enhances control and confidence with every shot.
